Compression Tester Kit 6pc

Selling Points

This compression tester kit comes complete with a large, easy to read 2 1/2" dial face with accurate Bourdon tube meter movement. Dual calibrated and colour coded scales read 0-300 psi or 0-2100 Kpa and side release valve. The 380mm high pressure, rubber hose with braided stainless steel casing (oil and grease resistant) fits with simple spring loaded action. A dual 14/18mm adaptor is fitted to the hose for quick and easy testing of most modern vehicles. Additional 10/12/14mm long reach adaptors are included for deep seated spark plugs. The 12mm adaptor can be used on motorcycles, ATV and marine applications. Quick release couplings and direct shaft attachment give fast and convenient hook ups. Can be used to detect worn rings, burnt valves, blown head gaskets, sticking valves, carbon build up in cylinders etc.
