Paint Right Over Rust!

Welcome

Dear Friends,

It starts with an idea. Someone once said there's nothing new... only variations of something that already exists. In varying degrees, I believe that.

We *never* copy products, but we look at things and ask, "what if.....? (What if this stuff lasted longer? Or smelled better? Or wasn't hazardous?), etc. If some of our "what ifs" come true through research, we might have another product to sell. Then we check to see if we can improve performance, which often leads to new formulations and keeps us on the cutting edge of technology.

For example, there's a product in every hardware store and carwash that puts a great shine on tires, dashboards, etc. It's got a famous name, but the shine lasts only a few days. So we developed **Boss Gloss**, which lasts more than a month! Try it...we think you'll like it.

Example 2: We bought a leading epoxy garage floor coating kit and looked at the directions, which tell you to first flood your garage floor with water. Flood my garage floor? Are you crazy? What happens when water runs under the studs and floods my family room and laundry room as well? So we developed a dry system that works better, faster and is tougher, stronger and easier to install...tire and scuff marks come off easily with a damp rag. We call it **Floor Armor**, and it's in this catalog, but if you need more information, ask one of our skilled reps when you call toll-free. We're working to make life easier for you!

...And we're not stopping. More great products are coming your way from POR-15. So stay tuned and keep buying our fully-guaranteed stuff! We're always there for you.

Tom Slutsker
Chairman, POR-15, Inc

Index

You will notice many exciting changes in this new 2011 catalog. For example, our front index (at the right) is color-coded by product category and matches our interior page colors to help you find the right product quickly at a glance.

Another, more detailed, index can be found at the back of the catalog on page 53. It is also color-coded and re-designed to be simple and easy to use.

You'll find the product pages to be cleaner, simpler and more informative.

From clean new packaging to clearer step-by-step instructions, all of our new materials have been designed to make our products easier to use, safer, and more efficient. And this is just the beginning... we will continue to upgrade our packaging and materials to help make POR-15 products more user-friendly than ever.

New catalog in easy-to-use format

This all new POR-15 catalog has been re-designed with color-coded sections to find exactly what you're looking for at a glance with a quick index above and a more detailed index on page 54.

THE NAKED TRUTH ABOUT RUST PREVENTION!

SOME IMPORTANT FACTS COMPETITORS DON'T WANT YOU TO KNOW!
TOP SECRET!

Why is POR-15® only available in black, silver, gray & clear?

Black, silver, gray, and clear are the only colors that can be made with non-porous chemicals.

Why is it important that POR-15® be non-porous?

Only a non-porous coating will keep moisture from going through it and causing the metal underneath to rust.

Why can't you make POR-15® in red, blue, yellow, green, white, or other colors?

We would if we could! But blue, red and other colors require porous pigments, and you can't equal POR-15's effectiveness with porous pigments.

Other rust paints claim they contain "new" chemistry that makes colors possible, is not sensitive to the sun, and is just as effective as POR-15.

Unfortunately, there are a lot of unfounded claims going around about "rust stopping" products that come in colors with no UV sensitivity. However, the truth is that these knock-offs are nowhere near as TOUGH or EFFECTIVE on RUST as POR-15.

"RUST-STOPPA" PAINT!
ALL COLORS!
NOT UV SENSITIVE!

The truth is that the chemical engineers at POR-15® are on the leading edge of rust prevention technology, relentlessly searching out new ways to make our products even better. And if technical advancements are made, you can be sure it's been scientifically-tested and proven effective, before the POR-15® name goes on it!

Use the **POR-15** System to Stop Rust Permanently!

POR-15® products are designed to work as a complete system. When used together, they provide you with a coating that not only stops rust, but prevents it from returning. To aid you in your rusty metal project, we've included the following steps to explain various stages in rust prevention. All **POR-15**® products are available individually, and many are available in money-saving kits geared to your specific restoration need. Here is how the system works:

CLEAN IT!

STEP 1 - Degrease & Clean Surface

Clean metal surfaces with water-based **Marine Clean**™ degreaser/cleaner. Environmentally safe, **Marine Clean**™ removes dirt, grease, wax and other contaminants that interfere with restoration. See page 6 for more information on **Marine Clean**™.

PREP IT!

STEP 2 - Neutralize Rust; Etch Metal

Spray **Prep & Ready**™ on the surface to remove rust or prepare it for **POR-15**® Rust Preventive Paint. **Prep & Ready**™ neutralizes rust, etches metal for better adhesion, and coats it with zinc phosphate for permanent adhesion. See page 7 for more information on **Prep & Ready**™.

PAINT IT!

STEP 3 - Apply Rust Preventive Coating to Surface

Apply your first coat of **POR-15**® Rust Preventive Paint. You'll get an unbelievably tough, hard, finish that won't crack, chip, or peel. It's so tough you can pound it with a hammer and not damage it! That's **REAL** protection! See page 8-11 for more information on **POR-15**®.

TOPCOAT!

STEP 4 - Topcoat the Surface

Topcoat your job with **Stirling Silver**™ or any other **POR-15**® coating that suits your needs. **Stirling Silver**™ has a tough medium-gloss silver finish. See pages 12-17 for more information on topcoats.

Contact your **POR-15**® supplier for pricing

1 Clean It!

Marine Clean™

Cleans & Degreases in One Application

Marine Clean™ cleans and degreases in one application without leaving residues, noxious fumes or flammable solvents. No other cleaner works as fast or as well. It makes petroleum-based cleaners almost obsolete because **Marine Clean™** can be diluted with water to 3, 4, 5, and even 10 times its volume while remaining even more potent than other cleaners.

Marine Clean™ removes grease, oil, mildew, algae, musty odors, soap films and wax. Use it to clean canvas, vinyl, nylon, holding tanks, grease traps, auto parts and more. See for yourself the difference that **Marine Clean™** can make at home, work

or play. Before applying ANY rust preventive paint or coating, you **MUST** remove any oily film or residue. Even if you're fairly sure that your work piece is clean, hit it with **Marine Clean™** to be absolutely certain of good adhesion.

Quart..... Part # MCQ
Gallon..... Part # MCG

Applications:

- Engines
- Transmissions
- Frames
- Removes rust stains from porcelain sinks, toilets & tubs
- Suspension Components
- Holding & Water Tanks
- Rubber, Nylon, Vinyl
- Floor Pans
- Grease Traps
- Water Line Scum
- Fuel Tanks
- Galleys
- Clothing
- And More...

“ We used the POR-15® Marine Clean™ degreaser to remove any surface oils or other contaminants on the metal. After primer, the correct semi-gloss black paint from POR-15® was applied with a spray gun and compressor on all parts of the frame. ”
– Rod and Custom Magazine.

Prep It!

Prep & Ready™

Etches Metal & Leaves a Zinc Phosphate Coating

Now that you've degreased and cleaned your metal, use **Prep & Ready™** to guarantee the best paint adhesion on ANY metal surface, including aluminum and shiny polished metal surfaces. Simply spray on **Prep & Ready™** and keep it wet for 20 minutes. **Prep & Ready™** etches metal, leaves a zinc phosphate coating, and creates the perfect anchor pattern for any topcoat, especially our incredible **POR-15®** Rust Preventive Paint.

Features:

- Easy to use - One-Step Process
- Coats Metal with Zinc Phosphate
- No Harmful Residues
- Insures Perfect Paint Adhesion
- Is Re-Usable
- Provides Perfect Base for All Paints
- Removes Surface Rust in Minutes!
- Gives Better Welding Conductivity

Quart..... Part # MRQ
Gallon..... Part # MRG

“...we located the rustiest car we could find and performed a complete floor pan replacement. The key to the repairs is etching the new metal with Prep & Ready™ and sealing it with POR-15® and paint... This ensures that rust will not be a problem in the future.”

– Muscle Car Review Magazine.

POR-15®!

“ It's called **POR-15**®, and it's the slickest concoction we've seen in some time. We repaired a mildly rusty '69 Camaro floorpan in about an hour of actual work... and the floorpan is now as good as new, maybe even stronger. ”

-Car Craft Magazine

Step-by-Step Restoration

BEFORE: Heavily rusted diamond-plate pick-up truck beds can be a problem, fix them permanently with **POR-15®**.

Step 1: First degrease carefully with water-based **Marine Clean™**.

Step 2: Next, neutralize rust and prep with **Prep & Ready™**.

Step 3: After thorough washing and drying, coat with **POR-15®**, right onto the rust! (We used **POR-15®** black for the photography.)

Step 4: Next, top coat with **Stirling Silver™**, or other topcoat of your choice.

After: Now you have a **PERMANENTLY** repaired truck bed, that will **NOT** rust again.

Features:

- 1 quart covers 96 sq. ft. (single coat) / 1 liter covers 9.2 M²
- Double the solid content of most ordinary paints
- Compatible with all paint systems
- Tested to over 450°F / 232°C
- Exceeds 2000 hours salt spray test
- Dries faster in humid conditions
- Repels all fuels and oils
- Resistant to most acids and alkalis
- Hammer tough
- Self leveling
- Single Component

Paint It!

POR-15®

No Need to Remove Rust First!

The secret lies in **POR-15®**'s curing process. Most paints dry through evaporation, but **POR-15®** dries faster when moisture is present. It has the opposite chemistry of ordinary paints... it dries faster on rainy days than on sunny days! Now add to that **POR-15®**'s incredible hardness, toughness, and flexibility, and you have a coating that is practically indestructible. **POR-15®** is great for auto restoration, but it's also a state-of-the-art concrete preservative and floor coating. Try the many uses of **POR-15®** and you'll understand why this incredible product is now sold in 52 countries around the World. We make **POR-15®** in black, silver, gray, semi-gloss black, and clear. We don't make it in colors because colors require porous pigments and **POR-15®** is a non-porous product. Porous pigments let moisture through. **POR-15®** won't let moisture get through it.

NOTE:
POR-15® will seal concrete and cinderblock, but for the ultimate protection and beautiful finish on concrete, see **Floor Armor™** on page 30.

Super Starter Kit

Try it First... Prove it to Yourself!

We have created this "SUPER" kit by popular demand from customers anxious to try out our entire 3-step rust-stopping system. You'll get a 4 oz. can of **POR-15®** (enough to cover 12 sq. ft.), a half-pint of **Marine Clean™**, a half-pint of **Prep & Ready™**, two wooden handle paint brushes, and a pair of our special high-dexterity surgical latex gloves.

Super Starter Kit.....Part # SSK

*Specify black, silver, gray, clear or semi-gloss black.

POR-15®

Farm, industrial, marine, commercial and construction industries all use **POR-15®** to protect expensive and valuable equipment against rust, abrasion, and even graffiti. **POR-15®** also has excellent "surface tolerance", which means it works very well on porous surfaces, such as wood, fiberglass, concrete, and bricks. Try some for yourself!

Applications:

- *Automotive – chassis, doors, floors, trunk areas, suspension, engines & fuel tanks*
- *Industrial – heavy equipment, truck components, trailers, fuel storage, rebar, steel forms, concrete, storm gates, transformers, wastewater management*
- *Marine – decks, bilges, hulls, steam pipes, chain lockers, masts*
- *Home – seal cracks in basements and foundations, garage floors, roofs, HVAC, pipes, beams, home appliances*
- *Also excellent for sealing and repairing fiberglass*

Smash it!

Topcoat It!

Hardnose™ Paints

Check out our new super-tough **Hardnose™** Paint.

Hardnose™ paints are tough, glossy, two-component coatings for use over primed or painted surfaces. When fully cured, **Hardnose™** paints are rock-hard, chemical-resistant, and incredibly tough. Durable and easily cleaned, they will not crack, chip, or peel with age. These beautiful, two-component coatings are stronger than any color paints you have ever tried. The long-lasting brilliant colors will look terrific wherever you use them, and will withstand incredible abuse.

Hardnose™ Paints

This set of trailer wheels went from an ugly rusted mess to absolutely beautiful after our 3-part rust prevention system, topped off with **POR-15®** & **Hardnose™** Paint.

Before

Use **Hardnose™** paints on your wrought iron, and you'll have a beautiful finish that will never chip, crack, or peel. Put **Hardnose™** on your tractor, wheel barrow, or bulldozer – anything that needs tough paint. **Hardnose™** paints are also excellent for industrial applications. Use them on equipment exposed to strong acids, alkalis, salts, fertilizers, or other aggressive materials, where most coatings fail quickly. Brush or spray **Hardnose™** paints with no worry about harsh brush marks. You'll be amazed and delighted at how well **Hardnose™** Paints hold up under conditions that would quickly destroy ordinary finishes.

Note: We recommend Xylene for thinning **Hardnose™** paints.

After

*No coating is as effective as our own **POR-15®** for stopping rust. So, if you plan to use **Hardnose™** colors on a rusty item, or one that is subject to future rust, we strongly recommend that you first coat the item with **POR-15®** Rust Preventive Paint.*

4 Topcoat It!

WhiteCote™

WhiteCote™ is a tough, glossy, two-component coating for use over primed or painted surfaces. When fully cured, **WhiteCote™** is rock-hard, chemical-resistant, non-porous, and incredibly tough. Durable and easily cleaned, it will not crack, chip, peel, or yellow with age. **WhiteCote™** will withstand even the most intensive UV environments.

WhiteCote™ meets POR-15® specifications for durability and strength, with strong emphasis on toughness and anti-graffiti properties. Use it on equipment exposed to strong acids, alkalis, salts, fertilizers, and other aggressive materials, where most coatings fail quickly. Brush or spray **WhiteCote™** with no worry about harsh brush marks.

Note: We recommend Xylene for thinning **WhiteCote™**. Try some **WhiteCote™** today!

Pint	Part # WCP
Quart	Part # WCQ
Gallon	Part # WCG

BEFORE:

We took this old, stained, chipped sink and treated it with **Marine Clean™** and then lightly scuffed the surface.

We then applied **WhiteCote™** to the chipped areas first.

After the first coat dried, **WhiteCote™** was applied to the entire sink.

AFTER!

The sink looks like new!

Applications:

- Wrought Iron furniture & railings
- Boat hoists, decks, engine rooms, etc.
- Commercial & industrial uses
- Doors, gates, fences & guard rails
- Marine & automotive fiberglass & plastic
- Appliances, sinks & tubs
- Farm equipment

Paint It!

FlexCote™

Developed for the marine industry to resist moisture and salt spray, our **FlexCote™** has been found to work incredibly well in construction and industrial applications in any climate. Our new single component topcoat for use over **POR-15®** Rust Preventive Paint or other painted and primed surfaces. Our formula is simple: we pack **FlexCote™** with a higher solids content than other paints have and we use less solvent as a carrier. When the solvent evaporates, there's more paint on the job. **FlexCote™** has excellent hiding power and has exceptional long-term gloss and color retention. It is also extremely flexible and resists abrasion and chipping which means long term durability. Available in 16 great colors. **FlexCote™** can be brushed, rolled or sprayed.

Topcoat It!

Metal Mask™

Is it bare metal, or is it Metal Mask™?

Rejoice, restorers! After years of development, we have finally answered your urgent requests for a super-tough coating that looks just like bare metal. Now you can permanently coat and protect all of those components on your chassis that were left unpainted by the factory when your vehicle was new. Items such as spindles, steering boxes, coil brackets, rear ends, leaf springs, bolt heads, suspension components, master cylinders, coil springs, gas tanks, cast iron transmission housings, and others will look "factory correct" when coated with **Metal Mask™**.

Gone forever are the days when you had to rely on "cheapo" cans of enamel spray paint that look good for a few months or weeks, but cannot withstand the rigors of the road.

Metal Mask™ is extremely tough, very chip and scratch resistant, and amazingly close to the color of brand-new cast iron or bare steel. And, **Metal Mask™** is the perfect coating for high stress bracketry, such as hood hinges, hood springs, hood latch assemblies, etc. It is super tough yet flexible, making it perfect for those areas where enamel paint is sure to flake away. Try **Metal Mask™** on your project today!

8 Oz.....Part # MMH
Pint.....Part # MMP
Quart.....Part # MMQ

Applications:

- Undercarriages
- Gas Tanks
- Engine Compartments
- Hood Hinges
- Master Cylinders
- Springs
- Suspension Components
- Latches

We painted 1/2 of this ball joint arm with **Metal Mask™** to show how closely it matches the appearance of bare metal.

Dry Air

Spray-Gun Filter

Downstream moisture will ruin your spray job. Stop failures with our direct in-line filter at the spray gun. Experienced users know that moisture cannot be present when applying **POR-15**... and even though your spraying system may have moisture traps and filters, condensation may also occur in the hose downstream and ruin your paint job. This great filter will absorb up to one (1) fluid ounce of moisture and insure a perfectly dry system from start to finish every time. It absorbs oil aerosols, condensed moisture, and contaminants as small as .01 microns. It attaches directly to the air inlet of your spray gun and, as air passes between the filter's compressed layers, particles and moisture are trapped. This incredible filtration is accomplished at a true 30 CFM to the spray gun, with a minimal pressure drop at the optimum flow rate.

Get your Dry-Air Spray Gun Filters today!

4 Topcoat It!

Glisten PC™

Protect wheels, bumpers, & other bright metal with the toughest clear coat available anywhere!

Glisten PC™ is a high gloss, rock hard, water-clear topcoat that was engineered especially for use in difficult applications. **Glisten PC™** bonds to polished aluminum, chrome, brass, and stainless steel like no other product you have ever tried. It's also terrific over existing paint—even very glossy surfaces.

Spray or brush **Glisten PC™**; it won't leave brush marks, and dries in less than 1 hour (reaches maximum hardness in a couple days). Once fully cured, it won't crack, chip, or yellow and

maintains a high level of flexibility.

Glisten PC™ utilizes high solid, moisture-curing urethane technology, setting new performance standards in adhesion, corrosion protection, flexibility, and UV stability. **Glisten PC™** is strengthened by exposure to moisture, and tensile strength is 2 to 3 times that of most other clear coats.

*Note: We recommend Xylene for thinning **Glisten PC™** paints. Also available in semi-gloss.*

- Pint** Part # GPCP
- Quart** Part # GPCQ
- Gallon** Part # GPCG

Glisten PC™ is a great defense against graffiti. Just use a solvent-soaked rag to wipe off graffiti without damaging the clear coat. **Glisten PC™** is also excellent at protecting existing coatings against corrosive materials, impact, and weathering. **Glisten PC™** is unaffected by most common chemicals including salt, acids, alkalis, and even fertilizer.

Super-Tough Clearcoat

AP-120 Metal Prep

The Key to Glisten PC™ Performance

Achieve the ultimate clear finish on polished metal, using our all-new **AP-120 Metal Prep**. Specially formulated to be used with **Glisten PC™** for the proper preparation of alloys and brass.

- 20 Oz** Part # AP20
- Gallon** Part # APG

Pelucid Classic™

Create a tough, incredibly "deep" clear finish with Pelucid Classic™.

Pelucid Classic™ is one of the most advanced single component clear coats in the world. It's super clear, super glossy, and unbelievably tough!

Spray or brush this non-yellowing single-component clear coat over painted surfaces that need a clear lustrous finish. The tough-yet-flexible coating dries clear as water, with a rock-hard finish that won't crack, chip, or peel. It's self-leveling, which means it won't leave harsh brush marks. It can be recoated 1 hour after Pelucid Classic™ is dry to the touch, depending on humidity, and full hardness will be achieved after 96 hours. Two coats should always be applied, to achieve maximum beauty and protection. Pelucid Classic™ has excellent adhesion qualities, and is highly chemical resistant. Check it out for yourself!

Engine Enamels

Painting an engine is not an easy job, and it's made more difficult because of the baked-on dirt and grime that has to be removed in order to achieve a memorable finish. Many restorers use solvent to take away the grease, oil, and dirt, but that's not the right way to do the job because solvent always leaves a residue behind that interferes with the quality of the final finish. Our **Engine Painting Kit**, with its unique cleaning system, eliminates the residue solvents leave behind.

- Our water-based **Marine-Clean™** gets rid of all dirt, grease, and oil and doesn't leave any residue.
- Our **Prep & Ready™** dissolves rust that's accumulated and preps the metal for the incredible **POR-15®** finishes that follow.
- **POR-15® Rust Preventive Paint** will keep your engine rust-free forever!
- **POR-15® Engine Enamel** will keep your engine clean and beautiful permanently!
- Our unconditional guarantee will keep you sleeping peacefully at night.

Engine Painting Kit

Buy this terrific kit and your shopping is done! It has everything you need to do a superior job, and includes the step-by-step instructions needed to make sure you do it right, especially if you're a beginner.

First our **Marine Clean™** gets rid of all dirt, grease and oil.

Next, use our **Prep & Ready™** to dissolve rust and prep the metal. Now prime and rustproof your engine with regular **POR-15®** (black or silver). And lastly, topcoat with our **POR-15®** extra-pigment engine enamel color of your choice, all in one convenient kit. You won't believe the job you've done... permanently!

Engine Painting Kit

..... Part # EPK

(indicate choice of color)

Kit Contains:

- Marine Clean™
- Prep & Ready™
- POR-15® (black or silver)
- POR-15® Solvent
- POR-15® Engine Enamel (choice of color)
- Paint Brushes
- Safety Face Mask
- Latex Surgical Gloves

Here's An Easy Way To Clean and Add Color to An Engine.

POR-15® makes an engine paint that dries to a smooth, tough, extremely glossy finish. Whether painting the entire engine or dressing only the upper end, the **POR-15®** engine paint kit is a handy tool. RestoMotive's **Marine Clean™** does a great job of cutting grease. Everything is included to do a first-class job of dressing up your engine.

Topcoat It!

POW-R-Liner™

POW-R-Liner™ Truck Bed Coating is a spray-on system

that creates a tough, moisture-resistant, non-slip coating. Standard drop-in bedliners trap moisture under the liner, promoting rust and corrosion. In addition, their plastic surface can be slippery and subject to cracking and tearing. Unlike these drop-in liners, **POW-R-Liner™** bonds directly to the surface and will not chip or peel, and most importantly, will keep out rust! **POW-R-Liner™**'s easy spray-on system gives you the ability to customize the texture and achieve professional-looking results.

POW-R-Liner™ is engineered to be applied on top of **POR-15®** Rust Preventive Paint for the ultimate in protection. (Rust, salt and temperature resistant)

*Note: Applicators and franchisees of other liner manufacturers have been coming to us for years stating how great their liner products work on top of **POR-15®** Rust Preventive Paint.*

Now also available as **Base & Hardener Quart Kit.**

IN 3 EASY
STEPS!**

POW-R-Liner™

Compare to Drop-in Liners

Drop-in liners trap moisture, causing rust. **POW-R-Liner™** conforms to whatever it is applied, providing great protection and a customized look.

- Easy to use: simply Prep, Shake, and Spray
- Waterproof and flexible
- UV and stain resistant
- Protects against scrapes, rust and corrosion
- Texture can be customized by air pressure.
- Helps to dampen road noise
- Can be applied to consumer and commercial vehicles, heavy equipment and machinery and more.
- Great for industrial and marine applications.
- Provides protection at a tremendous value.
- Comes with 1 gallon of product. Enough to coat 125 sq ft.

- Everything included to do-it yourself with professional results!

Full Kit Includes:

- 4 Quarts POW-R-Liner Base
- 1 Spray Gun
- 1 Quart Hardener/Activator
- 2 Pairs Latex Gloves

Floor Armor™ Kit

Works great with our Floor Armor Concrete Patching/Repair Kit™ on page 32

low, seal your floor permanently, with all-new **Floor Armor™** floor painting kits, from the makers of **POR-15®**.

No need for acids; no need to flood your floor with water. Just use our easy degreaser on any heavy oil or grease stains, scrub away any dust or dirt, and paint right over everything with **Floor Armor™**. Get the same fantastic results you have come to expect from world-

famous **POR-15®** Rust Preventive Paint, with this terrific new product. It is the result of several years of development by our own chemists and product specialists.

Use **Floor Armor™** in heavy traffic areas. It can take the abuse from forklifts, floor jacks, and constant traffic. Once your floor is covered with **Floor Armor™**, you'll wipe up oil and grease stains with a rag, and keep dust down too. Call for full details, or visit online to see how **Floor Armor™** will work for you!

Each gallon covers approximately 400 sq. ft.

Basic Kit Contains:

- Topcoat - Hardener/Activator
- Non-slip Aggregate
- 1/4" Nap Roller
- 1/2" Nap Roller
- 9" Birdcage Frame
- 2.5" Chip Brush
- StirStick
- Rubber Gloves

Before

After

Floor Armor™ provides a sealed, durable floor surface that is extremely chemical resistant and will last for years to come.

Step-By-Step Restoration

Step 1:
Mask walls, door openings and any permanent fixtures that do not require coating.

Step 2:
Sweep floor with a stiff-bristled broom or shop vacuum to remove loose debris.

Step 3:
If excessive oil/grease stains exist use the included **POR-15® Grease & Oil Remover** to prepare the surface.

Step 4:
Mix the **POR-15® Floor Armor™** ingredients and apply to floor with the nap rollers with overlapping strokes.

Floor Armor Color Options:

Kit, page 30

StraightLine™

Body Filler

The best body fillers in the world... guaranteed!

For many years customers asked us which body filler to use over **POR-15®**. In the past, we told them to first rough up the surface of cured **POR-15®**, because available body fillers simply couldn't stick to that tough, slick finish. But our faithful **POR-15®** customers wanted something better. Thus, we began work to develop a superior product that would be perfect for use over **POR-15®**. And now, after several years of testing and development, we're proud to offer a product that we think is the finest body filler on the planet!

StraightLine™ Body Filler has over 30% more resin than other fillers, which gives it much greater adhesion. This makes it the perfect choice for applying over top of **POR-15®**. **StraightLine™** has ultra fine particles for perfect feathering of edges, and is manufactured under vacuum, which eliminates those pesky air holes you've experienced with other fillers. It's more flexible, tougher, and able to tolerate higher temperatures than other fillers (you can even use it in a bake oven!). Use **StraightLine™ Body Filler** for steel, aluminum, galvanized steel, fiberglass, and many plastics.

No bubbles and ultra-fine particles for a super smooth finish

- 8 Oz.** Part # **STLH**
- 20 Oz.** Part # **STL20**
- 34 Oz.** Part # **STL34**

Applications

- 30% more resin (other fillers are loaded with too much talc)
- Manufactured under vacuum... pinholes are greatly reduced!
- Much more flexible than other fillers
- Ultra-fine particles, for perfect feathering
- Ready to sand in 20 minutes or less
- Tolerates higher temperatures... bake oven compatible
- Excellent for use with two-part or single-part paint systems
- Low absorption, so that paint doesn't soak into the filler; yields better coverage
- Convenient packaging; resealable hardener keeps product fresher longer
- Comes with resin, hardener, and filler applicator & instructions

Caliper Painting Kit

Dress Up Your Calipers!

Nothing ruins the appearance of a sharp set of wheels like dirty, corroded calipers lurking from behind.

Now, dress up those steel or aluminum calipers with a super-tough durable finish that will make your car or truck look terrific. Our new caliper paint is beautiful in appearance, and strong enough to withstand the punishment of road debris and temperature extremes. And it looks terrific on any car or truck.

Then, whenever your calipers get covered with dirt and brake dust, clean them with anything you like; the **POR-15[®] Caliper Paint[™]** will stand up to just about anything. It's easy to do yourself, just check out the simple instructions listed on the next page. Then place your order online or call today!

Kit Contains:

- (1 Qt) Caliper Cleaner
- (4 oz) **POR-15[®]** Rust Preventive Paint
- 1 Roll Masking Tape
- (8 oz) Caliper Prep
- (8 oz) Caliper Paint
- 2 Pair Gloves
- 2 Foam Brushes

Caliper and
Brake Line Removal
NOT Required!

Step-by-Step Restoration

Before

Directions:

Step 1: Remove wheels from vehicle. Calipers don't need to be removed. Don't remove brake line.

Step 2: Clean surfaces to be painted with **POR-15® Caliper Cleaner**. Spray on the cleaner and brush out dirt and grime with a small scrub brush and toothbrush. Wear protective gloves and glasses when cleaning your calipers. Read directions on caliper cleaner container before using.

Step 3: Wash cleaned caliper thoroughly with water and dry with clean towel. Now spray on **POR-15® Caliper Prep** and keep surface wet for 10 minutes. Then wash off caliper prep with water and dry thoroughly.

Step 4: Mask off the area not to be painted. Tape off brake bleeder screw, brake lines, and caliper piston boots.

Step 5: Open the small can of **POR-15® Rust Preventive Paint** and stir, making sure the contents are thoroughly mixed. Using a foam brush (included in your kit) paint the caliper evenly, making sure the coating is evenly applied but not to the point where the paint runs. Because this is a rust preventive coating you want to be sure you don't miss any spots which could rust later if not covered.

Step 6: When your **POR-15®** coating is just dry to the touch, with slight finger-drag remaining, open your can of **POR-15® Caliper Paint**, stir thoroughly, and apply the first coat in thin but even strokes. When the first coat is dry (3 - 4 hours), apply a second coat to achieve a beautiful ceramic-like finish. Congratulations...you should be proud of your work. You've used the finest caliper painting kit in the World and have achieved total rust prevention as well.

Steering Wheel Kit

Here at last, our **Steering Wheel Restoration Kit** will enable anyone to restore a steering wheel to show-quality condition. Our step-by-step instructions were written by leading experts in steering wheel repair. You will find the techniques you learn here useful in restoring other hard-to-repair items as well. Restore dash knobs, gear shift knobs, radio buttons, and other hard rubber, bakelite, or plastic interior parts. The **Steering Wheel Restoration Kit** is a must in restoring your old steering wheel to show-quality condition!

Complete Steering Wheel Restoration Kit
..... Part # SWRK

Kit Contains:

- POR Epoxy Putty™
- Marine Clean™
- Latex Surgical Gloves
- Tack Cloth
- Saw, File & Drill Bit
- Spray Bottle/Cartridge for Primer & Enamel
- High Gloss Polishing Compound
- Steering Wheel Sanding Board
- Contoured Sanding Block
- Red (360-400 grade) Scuff Pad
- Gray (600-800) Scuff Pad Sandpaper
- Polyester Primer & Surfacer with Hardener
- Detailed, Illustrated Instruction Book

Before:

This steering wheel had severe cracks along the underside and between many of the finger grips.

After:

The steering wheel has been restored, showing no signs of cracks.

Step-by-Step

Steering Wheel Restoration

Step 1: Spray on **Marine Clean™**, this will remove any dirt, grease, wax or other materials that could interfere with the restoration.

Step 2: Cut out the cracks, cutting clear down to the metal core, allowing **POR Epoxy Putty™** to completely fill the cracks and ensure proper adhesion.

Step 3: Moisten your fingers with water and mix the specialized two-part **POR Epoxy Putty™**. Knead, tear, mix and squeeze the putty until thoroughly blended.

Step 4: Press the **POR Epoxy Putty™** into the cracks, then feather-out the edges. The better it is feathered, the less sanding will be required after it dries.

Step 5: Sand between the finger grips and on contoured surfaces. Begin with the 100 grit for rough sanding, use the 220, and then the 320 grit paper for finish sanding.

Step 6: Slide a threaded rod through the middle of the wheel and secure with washers on each side.

Step 7: Wipe the wheel off with a tack rag, then spray on the primer and let dry.

Step 8: Sand the wheel with the 320 and then the 400 grit wet sand paper. Wipe the wheel down, then spray on the final color.

APPLICATION TIPS
Always wear safety goggles & latex gloves when using our products!
(Gloves available on page 50)

“ Literally everything you'll need, along with complete instructions, is included. There is enough in this (Steering Wheel Repair) kit to do quite a few repairs, so you might wind up repairing some friends' steering wheels as well. ” -Car Craft Magazine

HOT ROD

Fuel Tank Repair Kit

Fuel Tank Repair is more than just pouring in a quart of sealer and sloshing it around. If gum, varnish, sludge, or fuel are inside the tank, they must be removed first. Our **U.S. Standard Fuel Tank Sealer™**, like other sealers will not work in a contaminated tank. Find out what the pros already know... get our **Fuel Tank Repair Kit** with everything you need to do the job right! Call Today!

Complete Auto Kit

.....Part # **FTRK**

NOTE: Kits for Metal Tanks only.

Kit Contains:

- **Marine Clean™** to remove gum, sludge & varnish from tank.
- **Prep & Ready™** to remove rust & prepare tank for sealer.
- **U.S. Standard Fuel Tank Sealer™** to permanently seal tank.
- **Fuel Preservative & Stabilizer** to keep fuel fresh and fuel system trouble free.
- Detailed Instructions

Motorcycle Fuel Tank Repair Kits

Motorcycle Fuel Tank Repair Kits have been designed for the special needs of bikes and other small metal fuel tanks such as recreation vehicles, snowmobiles, outboards, generators, etc.

Complete Cycle Kit Part # **CTRK**

Motorcycle Fuel Tank Kits Contain:

- All items included in our standard **Fuel Tank Repair Kit**.
- Brush for applying patching system to exterior of tank.
- **PowerMesh™ Reinforcing Fabric** for sealing large holes or reinforcing weak areas.

Heavy Duty Motorcycle Fuel Tank Repair Kit

For those unfortunate customers who have had bad results from their inferior fuel tank sealers, we have developed these all new **Heavy Duty Tank Repair Kits**. They feature everything found in our regular **Motorcycle Tank Repair Kits**, plus a quart bottle of our famous **POR Strip™** to first remove that inferior coating that failed you.

Heavy Duty Cycle Kit Part # **HDCTRK**

Step-by-Step Restoration

Before: This fuel tank had small pin hole leaks on the end near the seam.

Step 1: Mix one quart of **Marine Clean™** with one quart of hot water. This solution will be used to remove any gum, varnish or sludge from the inside of the tank.

Step 2: Pour in the entire bottle of **Prep & Ready™** to dissolve rust, coat the tank with zinc phosphate, and etch the metal for better adhesion of the sealer.

Step 3: Heavily rusted areas require more time. After the tank is clean, drain the tank and rinse thoroughly with water. Let the tank dry.

Step 4: When you are certain that the inside of the tank is totally dry, pour in the entire can of **U.S. Standard Fuel Tank Sealer™**

Step 5: After all surfaces have been coated, drain the tank for about an hour to remove excess sealer from the tank.

Step 6: Once repaired, use **POR-15® Fuel Preservative & Stabilizer** to keep your entire fuel system in proper working order and to avoid "stale gas" problems in your future!

Contact your **POR-15®** supplier for pricing

Fuel Products

J.S. Standard Fuel Tank Sealer™

J.S. Standard Fuel Tank Sealer™ was formulated and developed in our own laboratories due to the demand for a high-tech sealer impervious to all fuels, including the new Stage II fuels which have a higher alcohol content. It has superior strength and fuel resistance, and does **not** contain Methyl Ethyl ketone, a highly flammable and deadly carcinogen (cancer-causing).

Features:

*Resistant to all fuels, alcohol, additives & solvents.
Stops rust, corrosion & leaks permanently.
Seals pinholes & seams - POR-15® TOUGH!
Chemically bonds to metal surfaces (even rusted).
Permanently flexible.
Light gray color for easier viewing inside the tank.
Available in quarts (capable of sealing a 25 gallon tank).*

8 Oz.	Part # TSH
Pint	Part # TSP
Quart	Part # TSQ
Gallon	Part # TSG

Fuel Preservative & Stabilizer™

When fuel sits for days or weeks at a time it breaks down chemically. Bad fuel can cause problems in your fuel system. When you pour **Fuel Preservative & Stabilizer™** in your tank, oxygen is chemically isolated (preventing oxidation) and corrosive compounds are neutralized (stopping rust formation). Our special dispenser bottle will measure exactly for you with no waste. Contains NO alcohol. Use 1 oz. per 3 gallons for normal maintenance, or 1 oz. per gallon to thoroughly clean your fuel system.

Features:

- For all gas & diesel engines, 2 or 4 cycle.
- Keep fuel fresh for over 2 years.
- Cleans fuel lines in concentrated doses.
- Special container treats 96 gallons of fuel with no waste!
- Stops corrosion & prevents gum varnish formation.

Use In: • Collector Vehicles • RV's • ATV's • Lawn Equipment
• Boats • Snowmobiles • Any Metal Fuel Tank • etc....

Pint	Part # FPP
Quart	Part # FPQ

Artisan™

Metal Polish

You'll never want to use any other polish again!

We believe that our **Artisan Metal Polish™** is the finest product of its kind.

Artisan Metal Polish™ is especially formulated for professionals and others that want a fast-acting yet gentle polish. Use it to quickly put a fabulous shine on chrome, aluminum, brass, steel, stainless, silver, or any other bright metal surface. Try it on your car, truck, motorcycle, boat, brass lamps, silverware, aluminum or chrome wheels, and hundreds of other uses. You'll love the results.

We first tested this polish in the shop of a true craftsman, who restores and builds motorcycles. Because there is so much chrome and aluminum on those vintage machines, he requires an easy-to-use, fast-acting polish. After extensive use, he called us to say that **Artisan Metal Polish™** is indeed the finest metal polish he has ever tried (and he claims to have tried them all). We gave more samples to friends with antique cars from the brass era, to others from the '50's chrome period, to some boat owners, and to an antique brass lamp collector. Everyone has reported tremendous satisfaction. Call today and try **Artisan Metal Polish™** for yourself.

4 Oz. Part # AMP

Try it on:

- Cars
- Trucks
- Boats
- Motorcycles
- Antiques
- Coins
- Jewelry
- Silverware
- Chrome
- Aluminum
- Brass
- Nickel
- Copper
- Stainless
- Steel

This old motorcycle part was dark and corroded. We taped off a section to clearly show "before & after" comparisons.

*We used a small amount of **Artisan Metal Polish™** on a soft cloth, and rubbed one spot vigorously.*

In just a few seconds, we had a beautiful shine. Compare for yourself!

Contact your **POR-15®** supplier for pricing

Boss Gloss™

Clean & Protect Plastic, Rubber & Vinyl

Treat and preserve plastic, rubber, and vinyl with a higher quality product. After we had tried some of the big national brands, we were disappointed with the way they seemed to fade away so quickly, and in no time at all, we had to reapply the stuff. Also, it seemed to attract dust. Our chemists

told us that this was partly because the big companies reduce the amount of solids in their products to save costs, and partly because they use alcohol and other solvents. We decided to make our own premium quality product, in the style and tradition of all other POR-15® Products, with more solids, and NO alcohol or solvents which can remove vital plasticizers, and lower the life expectancy from vinyl and rubber. Our special combination of premium chemicals turned into a terrific product, which we call **Boss Gloss™**. We were delighted to learn that, as a side effect, **Boss Gloss™** seems to repel dust too!

Try **Boss Gloss™** one time on the interior of your car, truck, or boat. You will be delighted at the results and pleased by how long it lasts. Your complete satisfaction is guaranteed!

NOTE: Not for use on cycle seats or other surfaces where a slippery surface could be hazardous.

8 Oz. Part # **BGH**
20 Oz. Part # **BG20**

Applications:

- Perfect for car, truck, or boat interiors
- Excellent on computers and office furniture
- Great for lawn furniture, vinyl awnings, and umbrella (reduces dust accumulation!)

We cleaned this weathered hot cover with **Marine Clean™**

We then restored the cover with a small amount of **Boss Gloss™**, a soft cloth, and a little elbow grease

Here you can see the difference in the finished section.

Carnauba Wax

Brazilian Carnauba Wax

Our wax is made of the highest grade, pure Brazilian Carnauba then pre-softened for ease of application. The fabulous shine, rock-hard protection and the longevity of the finish are unparalleled. No fillers or cleaners are used in the formula. For the best shine protection, and ease of application, there is only one choice... our **Brazilian Carnauba Wax**.

12 oz. Can Part # CW

Pre-softened Brazilian Carnauba Wax for easy application...

and a fabulous shine!

POR-GLO™

This is not just a temporary top dressing like the well-known product that detailers use to make rubber and vinyl shine for a couple of days. **POR-GLO™** is a brilliant clear coating that lasts up to one year!

Not intended for use inside of vehicle.

8 oz. Part # VRH

Applications:

- Vinyl Landau Tops
- Tires
- Awnings
- Swimming Pool Covers
- Vinyl & Rubber Trim
- Bumpers
- Bike Seats
- Outdoor Furniture

POR Epoxy Putty™

“Unbelievable”

that's what restorers say when they see a demonstration of this incredible epoxy putty product.

It's so strong you can drill and tap it, yet gentle enough that you can apply it with your bare fingers. And since it is **Water Based**, you can simply wet your fingers, and work it until it is almost perfectly smooth before it dries - eliminating most sanding! But when it cures, it's **ROCK HARD**, making it perfect for repairing steel, plastics, concrete, etc. Amazingly, it even sticks to damp surfaces, and will cure **UNDER-WATER**, so it can be used to fix leaking basement walls, swimming pools, plumbing fixtures and so much more. Put some **POR Epoxy Putty™** in your tool box today. You'll find yourself using it all over your shop and home.

One pound pack.....Part #PU
Six pounds.....Part # PU6

Features:

- Malleable Consistency, Fill in Anywhere
- Hardens Like Steel
- Workable with Bare Hands
- Cures in Water
- Great Insulator
- Mixes Like Clay
- No Measuring or Weighing
- Stays in Place, Doesn't Slump or Sag
- Can Be Sanded, Drilled, Machined, Sawed & Painted
- Easy to Use

Applications:

- Steering Wheels
- Plastic Parts/Knobs
- Filling Rust Pits & Holes in Steel
- Patching Concrete
- Repairing Tool Handles
- Repairing Woodwork
- Doors, Hinges & Latches

Place the bars side-by-side and cut what you need. Then mix the two parts together until thoroughly blended.

“The putty dries absolutely rock hard, yet it sands very easily. This is great stuff.**”**

CHEVY
HIGH PERFORMANCE

POR Patch™

The Ultimate
Filler/Adhesive!
Apply right!
rust or me

Fix that Seam or Channel with **POR Patch™**
For years our customers have asked us for a thicker version of our world-famous **POR-15®**, to use for filling seams or holes. Here it is! **POR Patch™** is, quite literally, **POR-15®**, in a tube, and like **POR-15®**, it dries as hard as a rock, remains flexible, and once dry is totally impervious to fuels and solvents. It's so tough it may actually add strength to weakened metal. And it won't absorb moisture and swell like conventional body fillers. Try it yourself, it's incredible!

4 Oz. Tube (Black) Part # **PPB**
4 Oz. Tube (White) Part # **PPW**

Use It To:

- Permanently seal seams
- Repair loose furniture joints
- Patch holes in steel, wood, or plastic
- Fix holes in fuel tanks
- Bond steel to plastic, wood, or concrete
- Repair concrete and cinder blocks

Before: Rusted, leaking seam.

Squeeze a bead of **POR Patch™** into seam.

Press and contour bead into seam.

After: Seam is sealed, smooth, permanently free of rust, and ready for a coat of **POR-15®**.

Fill in cracks in most surfaces

POR-Strip®

POR-Strip® Paint Remover/ Stripper is a clear spray-on remover, with the consistency of water. In sample testing, our **POR-Strip®** was the choice of professional auto strippers. A special chemical-resistant spray bottle allows you to use less and finish faster than brushing. Remove any coating from any surface without damaging window, glass, chrome, or weather-strip. **POR-Strip®** is non-acidic and will not harm aluminum or factory fiberglass.

Quart Part # *RSQ*
Gallon Part # *RSG*

Removes:

- All Paints
- Enamels
- Epoxies
- Acrylics
- Lacquers
- Polyurethanes
- Body Fillers
- Imron
- Marine Finishes
- Even **POR-15®!**

Always wear safety goggles & latex gloves when using our products!
(Gloves available on page 50)

Just spray **POR-Strip®** right onto the painted surface

Almost instantly, **POR-Strip®** begins to bubble the layers of old paint. Spray more, if needed.

Strip **LAYERS** of paint!

Dauber Kits

For years our customers have told us stories of their struggles when trying to apply rust-preventive **POR-15**[®] into hard-to-reach areas, such as floor pan braces, frame rails, roof channels, rocker panels, fender braces, wheel houses, truck beds, the insides of tail gates, and the braces under trunk and deck lids. Everyone knows that these areas are exactly where rust often gets started. But how to apply **POR-15**[®] there has been a challenge.

This year we decided to address the problem, and tried many solutions. Finally we came up with these terrific new exclusive **Dauber Kits**, with wool tips on both ends, and light wire bodies that can be easily bent to fit your special needs. In field tests, customers were delighted with this simple and cost-effective solution to the age-old problem.

Now you can easily apply **POR-15**[®] to the inside of doors and tailgates, without fear of ruining window regulators or other linkage. It's easy to reach those blind areas now, such as the inside of a steel pipe. Try a **Dauber Kit** to apply **POR-15**[®] to the inside of swing sets, motorcycle frames, farm equipment, or anywhere you can't reach with a regular brush!

Kit contains 2 each of 3 different sizes, from 12" up to 24" in length.

Dauber Kit
.....Part # DK

6 double-ended Daubers come in the convenient kit, in 3 lengths.

Handy wire bodies easily bend to make any shape.

Reach up inside floor braces and channels, often with existing holes.

*Keep frames, tailgates, and other hard-to-reach places coated with **POR-15**[®].*

Stop rust where it occurs first, in hidden nooks & crannies.

Accessories

Paint Brushes

Our throw-away-price brushes will hold more paint and spread more smoothly than most expensive brushes.

Features

- Thick, Real Wooden Handles
- Ferrule is Nailed, Not Crimped
- Bristles Set in Vulcanized Rubber
- 100% Natural Bristle Holds More Paint, Spreads Smoother

Qty	1/2"	1"	1 1/2"	2"
6	•	•	•	•
12	•	•	•	•
36	•	•	•	•

Gloves

Our latex gloves are thin, close-fitting, and have the dexterity and protection of fine surgical gloves. They are regular cuff length with very high tactile sensitivity and will fit either hand. We've used these latex gloves in our laboratory for years and found them to be excellent for even the most sensitive jobs.

Large size fits medium and small, as well.

2 Pair	Part # GL2
10 Pair	Part # GL10
5 Pair	Part # GL5
Box of 100	Part # GL50

Paint Spouts

Flexible Paint Spouts eliminate messy drips and keep grooves clean for resealing cans. Order enough for all your paint cans.

Features

- Fits Pint, Quart & Gallon Cans • Use Over and Over
- Easy to Clean - Dry Paint Pops Off • Made of Flexible Plastic
- Not Affected by Paint or Solvents • It's a Brush Wiper!

One Paint Spout	Part # PS1
Five Paint Spouts	Part # PS5

Supertack Cloths

Our **SUPERTACK** dry wiping cloths are terrific for paint jobs, in your car, at your computer, or your electronic gear. An excellent dry tack cloth for use before painting. Picks up dust and lint to ensure a perfect job!

Features

- Durable - Due to Cell Structure • Soft, Pliable, Dry, Won't Scratch
- Highly Absorbent, Low Lint Content • Chemically Pure & Reusable
- 12" x 23"

6 Cloths	Part # SW6
12 Cloths	Part # SW12

Why

Stops Rust and keeps It Stopped!

What causes RUST?

RUST occurs when moist air comes in contact with metal. Moisture softens ORDINARY paint and works its way underneath to the bare metal. RUST begins to form.

What will protect metal from RUST?

Any coating that will PERMANENTLY keep moisture away from metal. WHY USE POR-15? POR-15 is an ANHYDROUS product (made without water). It is VERY sensitive to water but not in the way you might think!

ORDINARY paints are softened, weakened, and eventually destroyed by moisture.

POR-15 is STRENGTHENED by moisture, as the REVERSE chemistry of ORDINARY paints. It sticks to metal like nothing you've ever seen, and forms a rock-hard, non-porous coating. ORDINARY paints dry faster on dry sunny days, but POR-15 dries faster on HUMID, DAMP, RAINY days!

ORDINARY paints and coatings can be scratched away with your fingernail or a housekey, stone or rock. Once scratched RUST begins to form.

Try to scratch POR-15. Use your fingernail, key or even a pocketknife... you'll see how tough this coating is! Rocks and stones won't hurt it, yet it is very flexible! Metal can expand and contract without affecting the POR-15 coating.

You can use body filler with POR-15.
 You can paint over POR-15 with finishing paints.
 You can spray or brush POR-15.
 You can sand POR-15 (it isn't easy!).
 You can paint the underside of old cars with POR-15 and get the BEST UNDERCOATING without losing the authenticity of the car.

We said before that POR-15 sticks to metal like nothing you've ever seen! That is true, but POR-15 will also stick to YOU like nothing you've ever seen! And NOTHING will take it off once it has dried... except TIME! So please read directions carefully!

STEP-BY-STEP RESTORATION PROCESS

STOPPING RUST

PERMANENTLY is a step-by-step process.

NEW METAL often has an oily finish; OLD METAL has dirt & grease embedded in it. NEAR THE SEA, metal is coated with salt deposits. All of this has to be removed if you want PERMANENT POR-15® protection!

STEP 1 CLEAN METAL WITH MARINE CLEAN®

Get rid of the gunk. Permanent protection requires real preparation. MARINE CLEAN® dissolves bad stuff and deep-cleans your metal.

STEP 2 PREP YOUR METAL

PREP & READY etches metal, removes rust, and leaves an acid finish that's PERFECT for POR-15®.

STEP 3 APPLY POR-15 RUST PREVENTIVE PAINT

Brush it or spray it on...no brushmarks either way! You WON'T BELIEVE the incredible coating you'll get! Wait 4 hours or more and then...

STEP 4 PUT DOWN YOUR SECOND COAT

You can topcoat POR-15® after 4 hours with any cosmetic paint you choose, or with one of our great topcoats. Give us a call and we'll walk you through it.

JUST STARTING OUT?? CALL US TOLL-FREE AND WE'LL HELP YOU GET GOING.

Whether it's an inexpensive STARTER KIT or any other POR-15® product, we'll be there to help you every way we can. Give us a call, and a person, not a machine, will answer the phone.

POR-15[®] PRESENTS SURVIVOR STORIES

KATRINA SURVIVOR

Dear POR-15:

Hurricane Katrina made a POR-15 believer out of me! I own a 1971 Corvette that I had treated with POR-15 back in late 2004. At the time I was a resident of Chalmette, Louisiana, just east of New Orleans. As most people know, on August 29th, 2005 Hurricane Katrina ripped through Louisiana and Mississippi. I was forced to leave my Corvette behind. The car sat in 4 feet of water for over a week. When I finally was able to get into the city and inspect my car, I was surprised to see that the POR-15 painted surfaces look just as good as when painted. I managed to wipe off the mud from those surfaces with nothing more than a wet rag. POR-15 has to be the best stuff on Earth! All the metal parts of the car not treated with POR-15 were missing paint, pitted, and all around degraded from the chemicals in the water. I've made the decision to bring the car back to life again, and I am glad to say that POR-15 will be a key ingredient in it's restoration. With POR-15, if this car goes underwater again, the last thing I will be worrying about is the metal parts.

Thanks for your creation.

Mark Browning

Mark Browning
Former Chalmette, Louisiana resident

POR-15[®] can help you survive even the worst onslaught of rust and corrosion, by creating a tough, moisture-resistant barrier that simply will not chip, crack or fade.

POR-15[®] is the original and still the best in rust prevention!

Do you have a POR-15[®] Survival Story? Tell us about it, including details of your project with before and after pictures and your project could be featured in a future "Survival Stories" promotion. Visit www.por15.com for details and information!
